**IN THE UNITED STATES PATENT AND TRADEMARK OFFICE**

Inventor: Goychrach  
Serial no.: 10/672,168  
Filed: September 26, 2003  
Title: MULTI-SHAPE AND MULTI-COLOR CHEMILUMINESCENT DEVICE  
Examiner: Anabel Ton  
Art Unit: 2875

**Amendment and Response**

Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

Dear Sir/Madam:

This response is in reply to the office action mailed on July 11, 2007.

**Claim amendments**

Claims 1, 6, 8-10, 14, 34, and 37-39 have been amended, claims 2 and 4 were canceled; and claim 43 to 46 are new. All the amendments are supported in the original specification as filed. That means there are two additional dependent claims. Enclosed are fees to cover those two dependent claims.

The feature of aluminum coating, added in claims 44 and 45, is supported on page 18 of the description. Capsules comprising laminated aluminum (page 18 of the original specification) constitute a preferred embodiment of the capsule array according to instant claim 21; such an array may be manufactured, for example, by a technique known in the pharmaceutical industry as "cold forming."

**Drawing amendment**

A typographical error has been corrected: the array of capsules 11 in part (d) of Fig. 4 has been rotated by 180°. Although part (d) is merely a schematic representation, the client intended to have the capsules be visible from outside of the device, so that they might be broken by pushing inside, whereby their content being incorporated into the device (as seen in the corresponding PCT application publication WO 2005/031298). For this reason, it is applicant's opinion no new matter has been entered in the attached Replacement Sheet.

**Claim Rejections – 35 USC § 112**

Claims 1-42 were rejected as indefinite for comprising indefinite terms. The indefinite terms have been deleted throughout the claims.
